SUMMARY

Computer Science graduate with over 1 year of combined Quality Assurance experience across enterprise systems, web and mobile applications. Experienced in analyzing functional requirements, designing and executing test cases, functional and integration testing, regression testing, API validation, and defect management. Proficient in Jira and Postman, with working knowledge of SQL, SDLC/STLC, and Agile methodologies.

EXPERIENCE

White Cloak Technologies
Quality Engineering Intern | Ortigas, PH — June 2026 – October 2026

- Designed and executed 200+ test cases across four core HRIS modules and government certification systems, validating employee workflows, payroll rules, business requirements, and end-to-end system functionality.
- Identified and documented 50+ defects with severity, priority, reproduction steps, expected versus actual results, and supporting evidence; verified resolutions through manual and automated regression testing using Playwright MCP via Claude.
- Supported sprint reviews, post-MVP release documentation, and QA knowledge transfer for three Product Analysts; collaborated with cross-functional teams on workflow validation, requirements clarification, and system quality improvements.

PGX Group
Junior Quality Assurance Tester (Part-Time) — May 2026 – July 2026

- Independently designed and executed 150+ test cases across 9 workflow categories for a battery-swapping e-motorcycle platform, covering mobile, backend APIs, and simulated hardware, with senior QA guidance on functionality clarification.
- Reported 6–15 unique defects using Jira, retested Crashlytics fixes, and performed functional, regression, smoke, API, and System Acceptance Testing (SAT) across staging and limited production environments.
- Identified a potentially safety-critical battery-range discrepancy across vehicle models, coordinated requirements clarification with the Product Analyst, and updated test coverage to ensure correct business logic before development.

PGX Group
Quality Assurance Intern | San Juan, PH — August 2025 – March 2026

- Designed and executed 100+ test cases for a web and mobile FMCG rewards redemption platform, validating OCR receipt scanning across 50+ receipt scenarios involving varied image quality, orientation, completeness, and merchant formats.
- Validated business rules covering SKU matching, purchase date and merchant extraction, rewards point calculation, voucher redemption, duplicate receipt detection, fraud prevention, and API response accuracy.
- Identified and documented 20 unique defects involving OCR processing and rewards workflows, collaborating with developers and stakeholders to support defect investigation, retesting, and solution validation.

EDUCATION AND HONORS

Polytechnic University of the Philippines - Manila — Manila, PH
Bachelor of Science in Computer Science — September 2026

- DOST - SEI scholar RA 7687
- Consistent President Lister (2022 - 2026)

SKILLS

- **Quality Assurance & Testing:** Functional Testing, System Testing, Integration Testing, End-to-End Testing, Regression Testing, Smoke Testing, API Testing, System Acceptance Testing (SAT), User Acceptance Testing (UAT) Support, Test Scenario Design, Test Case Development and Execution, Retesting, Release Validation.
- **Requirements & Business Analysis:** Requirements Analysis, Functional Requirements Review, Business Rules Validation, Workflow Analysis, Gap Analysis, User Stories, Acceptance Criteria, PRD Review, Process Documentation, Release Readiness.
- **Defect & Test Management:** Defect Identification, Bug Reporting, Defect Tracking, Severity and Priority Assessment, Reproduction Steps, Expected vs. Actual Results, Evidence Documentation, Fix Verification, Test Execution Reporting.
- **Tools & Technologies:** Jira, Postman, Qase, GitLab, Playwright MCP, Claude Code, SQL, MySQL, PostgreSQL, REST APIs, Microsoft Excel, Git, GitHub.
- **Methodologies and other skills:** SDLC, STLC, Agile/Scrum, Sprint Reviews, Black-Box Testing Cross-Functional Collaboration, Stakeholder Communication, Knowledge Transfer

PROJECTS

DALI - Ecommerce – Manila, PH May 2025 – June 2025

- Led project planning and business analysis, producing 8+ project deliverables, including BRD, PRD, WBS, Gantt chart, and system diagrams.
- Translated business requirements into technical specifications for five core e-commerce features, aligning business requirements with development.
- Co-developed the full-stack application using Java, JavaScript, HTML/CSS, and MySQL.
- **Technologies:** Java, HTML, CSS, JavaScript, MySQL, Git

TechMatch – Manila, PH Dec 2024 – Jan 2025

- Co-developed a Java Spring Boot application, contributing to requirements analysis, system workflows, database integration, and full-stack development.
- Implemented event search and multi-criteria filtering using Spring Data JPA Criteria Specifications to handle optional filters and improve result accuracy.
- Developed RESTful APIs and tested filter combinations to identify incorrect results, duplicate records, and database query issues.
- **Technologies:** Java, Spring Boot, Spring Data JPA, Criteria API, REST APIs, MySQL, Git

Accomplishments

- **2nd place at International Joint Research Symposium (IJRS)** September 2026
  SETTLENET: ConvNeXt Encoder-Decoder Semantic Segmentation Of Irregular High-Density Settlements With Multimodal Fusion Of RGB Satellite, Building Count, And Height Maps
    - Co-presented SETTLENET, a multimodal satellite-image segmentation study; contributed to literature review, methodology, QGIS preprocessing, model evaluation, and frontend demo development. Received IDR 7.5 million in prize money.

- **Product Analyst Launchpad | White Cloak Technologies** September 2026
    - Completed a product analysis development challenge, conducting market and competitor research, requirements gathering and analysis, Product Requirements Document (PRD) creation, system diagrams, and prototype development using Claude Code and Claude Design.

- **Completer (Tier 2) | Google Cloud Pinas Season 2** Oct 2022 – Nov 2022
    - Completed 10 Google Cloud Quests covering BigQuery, Looker, and MySQL. (Highest required in data analytics track.
